University of Puerto Rico School of Medicine, Puerto Rico

Research Interest

Dr. Pineiro is interested in the treatment of hematological malignancies and stem cell transplants.

Why a patient should choose treatment at your practice?

We are a team of five physicians with vast experience in the treatment of hematological malignancies and transplants. We are personally involved in the planning and performance of our patients' treatment. We provide excellent care and are available resources to our patients and their families.

What is your personal philosophy around patient care?

Personalize treatment according to the patient's needs. The patient is central to our treatment plans, and our team will be directing the patient care and be present "all the way".
