Community Service

Why a patient should choose treatment at your practice?

We love our patients, and we truly care. We empathize and strive for excellence.

What is your personal philosophy around patient care?

Caring for patients is an honor and responsibility to preserve a sacred temple. Life is a gift from God and I consider a privilege to be used as an instrument to deliver wellbeing to my patients. My desire is to impact the life of my patients forever. Excellence motivates me, integrity drives me and innovation inspires me. Empathy, dedication and compassion are integral components for great results in cancer care. "You will lay hands on them and they shall recover." Mark 16:18. That's the job of a surgeon.

Community Service

- Missionary work among the Mayan in the Yucatan Peninsula

Why did you become a doctor?

Most noble profession - it's easy to impact people for eternity.
