Leading innovation in quality cancer care for Texans.

Texas Oncology uses evidence-based best practices to guide patient treatment across the network in a program known as Pathways, in collaboration with the National Cancer Collaborative Network. Texas Oncology physicians use these Pathways and programs to support genetic risk assessment, disease management, cancer survivorship, and advance care planning to improve the quality of the patients' cancer journey. At our comprehensive cancer centers, our

TEXAS ONCOLOGY

Founded in 1986, Texas Oncology is a pioneer in high-quality community-based

cancer care. Texas Oncology is an independent oncology practice with more than 530 physicians and more than 280 sites of service across Texas and southeastern Oklahoma, including 55 comprehensive cancer centers. Our practice includes 319 medical oncologists, 65 radiation oncologists, 31 gynecologic oncologists, 162 surgeons, and more than 200 advanced practice providers. Texas Oncology's community-based approach of integrated subspecialty oncology care enables patients to receive leading-edge treatment while living at home and receiving the critical support of family and friends. More than 71,000 new cancer patients were seen at Texas Oncology last year.

patients access much of their treatment under one roof from a knowledgeable and supportive cancer care team, including chemotherapy, patient navigation, social services, financial consultation, radiation, access to clinical trials, X-rays, PET, CT, other diagnostic imaging, lab, and pharmacy services.

Chimeric Antigen Receptor – T cell (CAR-T) therapy, which galvanizes the body's immune system to fight cancer, is one of the most promising treatment breakthroughts in recent years. Texas Oncology is one of the very few authorized centers in the country to initially provide CAR-T therapy.

Participation in leading-edge clinical trials.

Patients who are treated at Texas Oncology have the opportunity to participate in some of the most promising national clinical trials for a broad range of cancers. Texas Oncology's robust community-based clinical trials and research program has contributed to the development of more than 100 FDA-approved cancer therapies.

Wide scope of oncology subspecialties offer a broad range of services.

TEXAS ONCOLOGY IN EL PASO

Leading innovation in quality cancer care

for Texans. Texas Oncology in El Paso offers compassionate cancer care to patients at four sites of service using leading-edge technologies, innovative treatments, chemotherapy infusion, medical oncology, hematology, radiation therapy, genetic risk evaluation and testing, and other services. Diagnostic imaging, lab services, and pharmacies are close-at-hand to make the process more manageable. With more than 25 years of providing quality care to local patients, Texas Oncology is a leader in community-based cancer care in El Paso.

Expanding and enhancing sites of service to better serve patients in the El Paso region.

With more than 3,300 patients treated per year, Texas Oncology is expanding and modernizing its sites of service to provide comprehensive cancer care and an improved overall patient experience. Expected to be complete in August 2023, the practice is undergoing significant updates including the already completed upgrades to all diagnostic radiology technology and radiation therapy technology.

For Texas Oncology patients in El Paso, cancer treatment plans may include a combination of treatment types.

Texas Oncology uses leading-edge technologies and innovative treatments to create an individual cancer care plan for each patient, which may include a combination of treatment types specific to your needs such as chemotherapy, radiation therapy, immunotherapy, and targeted therapies.

Radiation Therapy in El Paso.

The practice offers advanced radiation therapy in El Paso managed by an experienced team that utilizes modern radiation therapy treatments, including stereotactic body radiotherapy (SBRT), stereotactic radiosurgery (SRS), intensity modulated radiation therapy (IMRT), image guidance, and brachytherapy.

Community Involvement.

At Texas Oncology, community is important. To further its commitment to the El Paso community, the practice supports a variety of local organizations through contributions and participation in activities and programs.

Genetic Risk Evaluation and Testing.

Texas Oncology provides an in-depth cancer risk assessment for individuals with a significant personal and/or family history of cancer.

Patient Support Services.

Treating cancer and blood disorders goes beyond medicine. Texas Oncology's sites of service in the El Paso region have a wide range of support services for patients and caregivers, including educational services, financial counseling, survivorship, and support groups. The practice is proud of its close relationship with active and retired members of the military community and accept Tricare to support El Paso's honorable service members fighting cancer.

Research and Clinical Trials.

The practice's sites of service in El Paso participate in a wide range of clinical trials and groundbreaking cancer research paving the way for new breakthroughs in cancer care. Texas Oncology patients in the El Paso region may be eligible to take part in these innovative clinical trials. Scan to learn more.
