Research Interest

Dr. Whiteley has a research interest in leukemia, lymphoma, and myeloma.

Other Information

Dr. Whiteley recently welcomed his daughter as the first addition to his family and enjoys biking, traveling, sports, good food, and spending time with family and friends.

Why a patient should choose treatment at your practice?

We have a large sub-specialized practice that has allowed me to focus solely on the treatment of hematologic disorders and hematologic malignancies. We have a thriving clinical trials program for myriad malignancies. Our staff are friendly and caring.

What is your personal philosophy around patient care?

I pride myself on communicating well with patients. You shouldn't have to have an advanced degree to understand your medical problems and treatment options. I educate my patients and provide my recommendations, and want them to feel empowered to share in the decision-making process about what is best for their health.
