Research Interest

Dr. Lampson has a special interest and expertise in the care of individuals who have completed treatment for childhood cancer. She leads a special clinic in our practice that focuses on the unique set of needs and concerns in childhood cancer survivors. Dr. Lampson has conducted research investigating the neuropsychological effects seen in pediatric leukemia survivors. She also has an interest in treating adolescent and young women with anemia due to bleeding issues or nutritional deficiency, as well as the treatment of individuals with platelet disorders.
