

Understanding My Cancer

Understanding the ins and outs of YOUR cancer can take time. Take a moment to reflect on questions about your diagnosis and treatment plan. Remember, you aren't expected to know everything and have the right to follow up with your medical team for more clarity.

What do I know about my cancer?

What do I know about my treatment plan options? How will my life be impacted by these plans?

Can I identify who is vital to my support (*Oncologist, Surgeon, Nurse, Social Worker, Patient Financial Counselor*)?

Has my medical team used any words that I don't understand?

What questions do I still have about my cancer diagnosis or treatment options?
