## Leading innovation in quality cancer care for Texans.

Texas Oncology uses evidence-based best practices to guide patient treatment across the network in a program known as Pathways, in collaboration with the National Cancer Collaborative Network. Texas Oncology physicians use these Pathways and programs to support genetic risk assessment, disease management, cancer survivorship, and advance care planning to improve the quality of the patients' cancer journey. At our comprehensive cancer centers, our

## Founded in 1986, Texas Oncology is a pioneer in high-quality community-based cancer care.

Texas Oncology is an independent oncology practice with more than 530 physicians and more than 280 sites of service across Texas and Southeastern Oklahoma, including 55 comprehensive cancer centers. Our practice includes 319 medical oncologists, 65 radiation oncologists, 31 gynecologic oncologists, 162 surgeons, and more than 200 advanced practice providers. Texas Oncology's community-based approach of integrated subspecialty oncology care enables patients to receive leading-edge treatment while living at home and receiving the critical support of family and friends. More than 71,000 new cancer patients were seen at Texas Oncology last year.

patients access much of their treatment under one roof from a knowledgeable and supportive cancer care team, including chemotherapy, patient navigation, social services, financial consultation, radiation, access to clinical trials, X-rays, PET, CT, other diagnostic imaging, lab, and pharmacy services.

Chimeric Antigen Receptor – T cell (CAR-T) therapy, which galvanizes the body's immune system to fight cancer, is one of the most promising treatment breakthroughs in recent years. Texas Oncology is one of the very few authorized centers in the country to initially provide CAR-T therapy.

## Participation in leading-edge clinical trials.

Patients who are treated at Texas Oncology have the opportunity to participate in some of the most promising national clinical trials for a broad range of cancers. Texas Oncology's robust community-based clinical trials and research program has contributed to the development of more than 100 FDA-approved cancer therapies.

## Wide scope of oncology subspecialties offer a broad range of services.

Twenty specialties enhance the portfolio of cancer services Texas Oncology provides to the communities served. Specialties include:

# TEXAS ONCOLOGY IN CENTRAL TEXAS

## Leading innovation in cancer care for Texans.

With more than 20 sites of service, Texas Oncology in Central Texas provides comprehensive cancer care to patients including medical oncology, radiation therapy, gynecologic oncology, surgical oncology, urology, blood marrow transplants and other services. Diagnostic imaging, lab services, and pharmacies are close at hand to make the process more manageable. With 29 years of providing quality care to local patients, Texas Oncology is a leader in community-based cancer care in Central Texas.

## Expanding and enhancing sites of service to better serve patients in the Central Texas region

Texas Oncology has the largest network of cancer-fighting physicians in Central Texas. Last year, Texas Oncology treated more than 13,000 Central Texans. As the communities across Central Texas continue to grow, Texas Oncology is expanding access to cancer care in the region by enhancing and growing its sites of service.

### Gynecologic Oncology

The gynecologic oncologists in Central Texas provide thorough evaluations and treatment plans using innovative therapies and leading-edge technologies such as minimally invasive, laparoscopic, or robotic surgical techniques.

### Radiation Therapy

Texas Oncology offers radiation therapy at seven sites of service across Central Texas. The radiation therapy team is comprised of radiation oncologists, physicists, and dosimetrists who provide robust modalities including imaging, computed tomography (CT) simulation, image-guided and external radiation therapies, brachytherapy procedures, and more. Texas Oncology has the only cancer care centers in the Austin area with the distinction of American College of Radiation Oncology (ACRO) accreditation.

### Surgical Oncology

Texas Breast Specialists and Texas Oncology Surgical Specialists provide advanced and less invasive surgical options such as laser, Mohs, laparoscopic, or thoracoscopic surgery to diagnose, stage, and treat cancer. This industry-leading surgical team serves as a part of Texas Oncology patients' cancer care team in Central Texas.

### Genetic Risk Evaluation and Testing

Texas Oncology provides an in-depth cancer risk assessment for individuals with a significant personal and/or family history of cancer.

## Colon and Rectal Surgery

Texas Colon & Rectal Specialists provide industry-leading care for both cancerous and non-cancerous colon and rectal conditions, including both not limited to colorectal cancer, hemorrhoids, fistulas and fissures, pelvic health, and inflammatory bowel disease. Across four Central Texas locations, this specialized, board certified team of surgeons offers advanced and less invasive procedures such as colonoscopies, da Vinci robotic surgery, and laparoscopic surgery.

## Urology

Texas Urology Specialists provide comprehensive urologic care in Central Texas from pre-screening, testing, and diagnosis to the ongoing treatment of urologic conditions for both men and women. These urologists are fully integrated with Texas Oncology and offer seamless care alongside patients' oncologists.

## Patient Support Services

Treating cancer and blood disorders goes beyond medicine. Texas Oncology's sites of service in the Central Texas region have a wide range of support services for patients and caregivers, including educational services, financial counseling, nutrition counseling, and support groups.

## Community Involvement

At Texas Oncology, community is important. To further its commitment to the Central Texas community, the practice supports a variety of local organizations through contributions and participation in activities and programs.

## Research and Clinical Trials

The practice's sites of service in Central Texas participate in a wide range of clinical trials and groundbreaking cancer research paving the way for new breakthroughs in cancer care. Texas Oncology patients in Central Texas region may be eligible to take part in these innovative clinical trials.
