General Summary

Dr. Mackey and her partners at Texas Breast Specialists are one of the only all-female breast surgical groups in Austin. She is fellowship trained and specializes in breast surgery that treats all breast conditions, from benign breast disease to malignant. She completed a breast surgical oncology fellowship at Columbia University Medical Center New York, where she learned comprehensive and innovative approaches for treating breast disease. Dr. Mackey is passionate about providing the best possible care for all her patients as well as the latest surgical techniques.

Other Information

Dr. Mackey is a Louisiana "Fightin' Tiger," who enjoys spending time outdoors, relaxing with her family, listening to live music, and traveling. She is married to a thoracic specialist who also treats cancer and together they have four children: two girls and two boys, as well as their 14-year-old pup. Dr. Mackey decided to relocate to Austin to provide new opportunities for her children and join an amazing group of women at Texas Breast Specialists.

"One of the great things about breast cancer is the community involvement; there are so many wonderful resources for patients and families, and I love being a part of this community!"
