**Research Interest**

Dr. Dham has experience in stem cell transplantation, benign and malignant hematological disorders as well as tertiary oncology care. Her research activities include work on pulmonary embolism after transplant, and coagulation disorders in Antiphospholipid Syndrome.

Dr. Dham’s clinical interests include malignant hematological disorders and solid tumors, especially breast cancer, gastrointestinal and thoracic malignancies. In addition, she has a special interest in the many issues that are faced by cancer survivors.

**What is your personal philosophy around patient care?**

Every patient is unique and needs personalized care, there is no “One size fits all” approach to cancer care.
