Other Information

When not caring for patients, Dr. Eastman enjoys traveling, reading, good food, and relaxing with family and friends.

Why a patient should choose treatment at your practice?

Patients who choose to be treated at Texas Oncology Rockwall/Mesquite have access to comprehensive breast cancer care as the Surgeon, Medical Oncologist, and Radiation Oncologist are all within the same office.

What is your personal philosophy around patient care?

Knowledge is power. As a physician, it is my job to effectively communicate with patients so that they understand their disease process and their treatment options. With that knowledge, they can hopefully make a decision regarding their care that they are comfortable with.

Why did you become a doctor?

I became a breast surgeon because I have an interest in women's health, and because it was important for me to be in a surgical field that allowed me to have a long-term relationship with my patients.
