Why a patient should choose treatment at your practice?

At Texas Oncology, we offer a personalized, leading edge treatment program for our patients including genetic counseling and participation in clinical trials while staying close to home and with a personal approach. Our patients are valuable individuals, not numbers. Our staff is skilled, compassionate, highly trained, and have many years of experience in their fields.

What is your personal philosophy around patient care?

Respect. I will always respect a patient's

**What is your personal philosophy
around patient care?**

decision. I believe that patients are intelligent and are fully able to make decisions if they are given the proper information. Also, I truly believe in quality of life and will bring up issues of terminal care when necessary.
