General Summary

Dr. Gorrebeeck (a.k.a. Dr. G) is a proud veteran of the United States Air Force. She served her country for 14 years before moving back home to Texas to be near family and friends and has been practicing oncology in the Austin area since 2010. Dr. G was drawn to the field of oncology as a young girl, having seen the effects of cancer in many loved ones, particularly her grandfather. She feels honored to be able to fulfill her calling in life while working in a rapidly advancing scientific field.

After walking the journey with her own husband’s cancer, Dr. G strongly desires to take care of the whole patient and not just the disease. This entails getting to know her patients and loved ones on a more personal level, which allows her to provide the most effective and compassionate care. Dr. G is inspired by the strength and bravery of her patients and loved ones as they face adversity. She aspires to truly make a difference in their lives.
