Research Interest

Dr. Reynolds is a contributing or principal investigator on multiple clinical trials for hematologic malignancies and blood & marrow transplant. She developed a special interest in post-treatment survivorship care after undergoing treatment for lymphoma while in medical school.

Other Information

Dr. Reynolds enjoys spending time at home with her son and husband. She is a sports fan, enjoys exercise, travel and Texas lake life.

Why a patient should choose treatment at your practice?

Cancer care is a team effort. I am proud of our fantastic care team, from the patient advocate at the front desk to the nurses who infuse your medication. I believe you will find that our team's love for what they do is evident. We are privileged to enjoy deep relationships with our patients and their families.

What is your personal philosophy around patient care?

Cancer treatment is a journey. I am honored to engage in that journey with my patients. I focus on providing information my patients can understand. I want them to feel empowered so that together WE can make the best possible treatment decisions throughout their care.

Procedures

- Bone Marrow Transplant
 - Autologous stem cell transplant
 - Allogeneic stem cell transplant
- Chimeric Antigen T-Cell Receptor (CAR-T) Therapy

Accolades & Memberships

- American Society for Transplantation and Cellular Therapy
- American Society of Clinical Oncology
- American Society of Hematology

Dr. Reynolds is the Associate Medical Director for Blood & Marrow Transplant Services at Baylor University Medical Center. In 2023, she was named by her peers to the Super Doctors® Rising StarsSM list for the fourth year in a row. Additionally, Dr. Reynolds serves as an adjunct Assistant Professor for the Texas A&M Health Sciences Center College of Medicine.
